I received my copy via Goodreads Giveaways.

I found the author's explanation of 'the mysteries of the universe' confusing; the combination of astrology/science/para-psychology/religion/self-help/numerology/ethereal energy/pyramidology/quantum physics far too much to take. As a result, as a grumpy traditionalist, I'm unwilling and/or unable to 'consciously create my reality', and will continue to engage with reality (most of which I haven't created) as best I can.
